BALTIC

IRON BALTIC

Iron Baltic is known as a leading manufacturer of accessories and towing equipment for off-road vehicles. Our vision is that the ATV / UTV can be an even more valuable and versatile machine.

We see an ATV as a versatile machine, so our goal is to help people to get the most out of their ATVs. That is why we offer accessories that make the off-road vehicle a more capable and more attractive machine with a wider scope of use.

We are committed to the development and production of top-level accessories for off-road vehicles, consistently investing in finding the best solutions. We not only want to create high-quality products, but also want to be a reliable partner who is always ready to support our customers.

We are constantly looking for new distributors and partners around the world to bring products closer to users. Feeling that our products can provide added value to customers, you are welcome to contact us at sales@ironbaltic.com to discuss.

We also encourage you to contact your local dealer for consultation and additional information. Find out more about our products and find your local dealer on our website:

www.ironbaltic.com

IRON BALTIC – GET MORE OUT OF YOUR ATV OR UTV

At Iron Baltic, we don't just make accessories - we help turn your ATV or UTV into a capable, do-it-all machine. Whether you're working hard, heading out for a ride, or doing both in the same day, our products are made to boost performance, add functionality, and help you get more done.

WHERE IT ALL STARTED

Back in 2006, in a small corner of Northern Europe, two friends - both engineers - saw something special in ATVs. Tiit Norak and Andrus Rints believed these machines could do more than just recreation. They saw potential. So they teamed up, started designing, and haven't looked back since.

It began with skid plates for the most common ATV models. From there, the lineup kept growing - now including attachments, accessories, and smart solutions for over 200 different models. Today, Iron Baltic is trusted worldwide for products that help riders and workers alike get more out of their machines.

WHAT WE STAND FOR

A CLEAR MISSION

We want to help you get the most from your off-road vehicle - making it stronger, more durable, and far more useful. Our gear is built to turn your ride into a reliable tool that works as hard as you do - whether it's hauling, plowing, clearing trails, or just having fun.

OUR VALUES

We take pride in what we build - and why we build it.

Focus: Off-road vehicle accessories are our thing. It's all we do, and we're all-in.

Quality: Every product is designed with real-world use in mind. If it doesn't hold up in tough conditions, it doesn't leave our factory.

Trust: We aim to be more than just a supplier. We're here to support you, answer your questions, and make sure our products actually make a difference.

SMART DESIGN, BUILT TO LAST

We're constantly improving - tweaking designs, testing materials, listening to customers, and building smarter. Our in-house team uses top-of-the-line CAD/CAM systems, and we test our products thoroughly before anything goes to production.

What makes the difference? We take feedback seriously. If a partner or end user has a great idea, we run with it. Many of our best improvements have come directly from people using our gear out in the field.

MADE IN-HOUSE, MADE RIGHT

We do as much as we can right here at our headquarters in Estonia. It helps us keep quality high and lead times short. Our manufacturing setup lets us move fast, adapt when needed, and deliver the kind of product we'd want to use ourselves.

WE'RE EVERYWHERE YOU NEED US

Iron Baltic products are available worldwide through our network of dealers and distributors. We've got warehouses in both Europe and the U.S., so orders ship quickly no matter where you are.

Interested in working with us? We're always looking for like-minded partners. Drop us a line at sales@ironbaltic.com or fill out the form on our distributor application page - we'd love to chat.

LOOKING AHEAD

What started as a simple idea - to help people do more with their ATVs - has grown into something much bigger. Iron Baltic is now a global brand, but our mindset hasn't changed. We're still driven by that same passion for solving problems, improving performance, and building things that last.

With Iron Baltic, your vehicle becomes more than just a machine - it becomes a real tool. One that works hard, holds up, and helps turn every task or ride into something better.

SKID PLATES

Iron Baltic aluminium skid plate kits are made from marine grade aluminium, which is the hardest aluminium that can still be mechanically processed. The aluminium is shaped using CNC cutting, the sides are then CNC bent, and the corners of the bent sides TIG welded. The outcome is a structurally rigid skid plate that is strong and durable even in extreme conditions. Iron Baltic skid plate kits come complete with arm guards and full mounting hardware required for installation.

Material	Corrosion resistant, brushed marine aluminium
Thickness	4 mm
Info	<p>Full protection of bottom and the front part of the ATV</p> <p>Openings for mud draining and washing</p> <p>Holes for oil changing</p> <p>Holes for plow mounting kits</p> <p>Fasteners and instructions are enclosed</p>

Iron Baltic plastic skid plate kits are made of high density polyethylene HDPE (PE-HWU), which does not dent, has excellent sliding properties and high chemical and UV resistance. The material remains very tough even at low temperatures (even at -50°C / -58°F) but is still flexible enough not to deform and regain its shape after an impact. Plastic skid plates are structurally rigid and durable with low friction properties offering easy and safe operations even in extreme conditions. Iron Baltic skid plate kits come complete with arm guards and full mounting hardware required for installation.

Material	Plastic (PE-HWU)
Thickness	10 mm
Info	<p>Full protection of bottom and front part of the ATV.</p> <p>Openings for mud draining and washing.</p> <p>Holes for oil changing.</p> <p>Holes for plow mounting kits.</p> <p>Fasteners and instructions are enclosed.</p>

MID-MOUNT PLOW SYSTEM

Mid-mount plow system for snow removal or soil planning. The plow mounts under the vehicle with a model-specific or universal mounting adapter. The mid-mount plow system is available in many configurations – with different types and sizes of plow blades or as a push broom instead. Wide selection of optional accessories are available

for the mid-mount plow – side extensions, marker antennas, rubber lips for the plow blades, and hydraulic or electro-hydraulic control and movement kits for the plow system.

- 5-position adjustable working position
- Spring-loaded resistance absorber
- Adjustable working angle
- Sliding shoes for height adjustment

FRONT-MOUNT PLOW SYSTEM

Front-mount plow system for snow removal or soil planning. The plow mounts with a model-specific adapter on front of the vehicle using a self-locking quick attach system. Front-mount system completes with different type and size of plow blades, or a push broom. With variety of optional accessories available, it can also be turned into a bucket or use with hydraulic or electro-hydraulic control and movement kits.

- 5-position adjustable working position
- Spring-loaded resistance absorber
- Adjustable working angle
- Sliding shoes for height adjustment
- Self-locking fastening system (quick and easy installation)
- Does not affect vehicle clearance
- High plow lift

UTV FRONT-MOUNT PLOW SYSTEM

A front-mounted plow system with reinforced coupling / locking mechanism for mounting the equipment with a model-specific adapter on UTVs or other larger side-by-side vehicles. UTV front-mount plow system completes with different size of standard plow blades and high-throw plow blades or a push broom. Additional accessories such as blade extensions or rubber lips, bucket conversion kits, and hydraulic or electro-hydraulic control and movement kits are available.

- Reinforced construction
- 5-position adjustable working position
- Spring-loaded resistance absorber
- Adjustable working angle
- Sliding shoes for height adjustment
- Self-locking fastening system (quick and easy installation)
- Does not affect vehicle clearance
- High plow lift

MID-MOUNT V-PLOW SYSTEM G2

The mid-mount V-plow version is a professional snow removal tool which is mounted on the bottom of the vehicle using a model-specific adapter. The plow has two independently adjustable wings. The steel parts of both wings are equipped with spring-loaded resistor dampers to avoid damage to the plow or vehicle in case of running into objects on the road.

The mid-mount V-plow kit can be assembled with 1500mm or 1800mm wide blades. Optional accessories like rubber extensions, rubber shields, rubber blades, or electric/hydraulic plow movement control sets are available additionally.

- Working height 400 - 600mm
- Working width 1500mm / 1800mm
- Different working positions (V position, straight, A position)
- Spring-loaded resistors
- Adjustable working angle
- Sliding shoes for working height adjustment

PLOW BUCKETS

Light material buckets are designed for the removal of snow, sawdust, wood chips, manure, peat, and other lightweight materials. The bucket set completes from a front-mounted standard blade with a width of 1280mm or 1500mm and an additional bucket conversion kit which forms the base and sides of the bucket around the plow blade. Dumping/tilting the bucket works with a mechanical dumping release (only bucket 1280mm) or hydraulically.

- Quick and easy installation
- Automatic bucket return & locking system (mechanical tilt)
- Working width 1280mm / 1500mm
- Capacity 130L / 150L
- Max load 50kg

2-IN-1 MODULAR PLOW BUCKET

An effective multi-purpose piece of equipment that can be used for cleaning, planing, and handling. The modular plow bucket combines a LOADER and PLOW in one. This means that when the bucket module is removed, the loader becomes a plow suitable for pushing work. The advantage of this equipment is the openable base of the bucket that allows it to be emptied in a raised position. Emptying the bucket can be done by either tilting a lever by the driver's seat or hydraulically with a hydraulic cylinder (among its accessories).

The installation requires a model specific front mounting system adapter attached to the ATV and a front winch (with a strong wire, rope, or lifting strap) that assists the raising and lowering of the bucket.

- Bucket working width 1 280 mm
- Bucket capacity 108 litres
- Bucket load capacity 50 kg
- Plow working width 1 280mm (with extenders 1 600 mm)
- Plow working height 360 mm
- Obstacle dampening with springs
- Skid shoes to adjust working height
- Special ball locking, quick coupling pins
- 5 positions of adjustable, plow-working positions
- The working angle and length of the tilting lever are adjustable according to the vehicle

SAND SPREADER G2-500 PRO

The towable, larger, increased capacity G2-500 PRO sand, salt, and gravel spreader is a practical and economical piece of equipment suitable for winter maintenance of yards, walking paths, and driveways. The spreader shaft is driven by a mechanical transmission from the spreader wheels. The wheels are equipped with clutches that allow driving without spreading, if necessary.

- Working (spread) width 1028mm
- Wheel transmission
- Adjustable spread rate
- Shaft for breaking and mixing bulk material
- For bulk materials (sand, gravel, salt) with a fraction up to 8mm
- Hub locks for adjusting the working and transport position
- Durable 8mm thick natural rubber parts
- Works with dry sand and salt

ROTARY BROOM

The rotary broom is an efficient tool for removing snow, fallen leaves, sand, debris, etc., from roads, streets, walking paths, and squares. The broom, which functions with a petrol motor, has a shaft fitted with replaceable polyurethane brush discs which, while rotating, will successfully clean different surfaces.

The broom has two supporting wheels which, depending on the work conditions, can be installed in front of, to the sides of, or to the rear of the broom. Front mounting the support wheels allows for the easy cleaning of pavement edges, and side mounting assists the brushes in plowing the surface. The supporting wheels also regulate the working height. The work and transport position are adjustable with the front winch of the vehicle. The broom is mounted to the vehicle via a model-specific mid-mount adapter.

- Working width 1270mm
- Rotation speed 250-450 rpm
- Replaceable polypropylene bristles (450mm diameter)
- Adjustable working angle in 5 different positions
- Adjustable support wheel position
- Transport and working position adjustable with vehicle winch
- Adjustable working height
- Use oil Semi-Synthetic 10w-40

SNOW BLOWER

A snow blower is the most efficient tool for snow removal. It is possible, with a blower, to move snow many meters away with very little effort, best suited for Nordic and mountainous areas with larger amounts of snow. It is best suited for the winter maintenance of roads and squares.

Iron Baltic snow blowers range varies between different working widths and engine options. Lower-powered (14hp) versions are designed foremost for lighter snow removal works. We recommend using snow blowers with a stronger engine (18hp) for the removal of thicker layers of snow and the wet snow.

The universal adjustable telescopic coupling frame allows for the quick and easy attachment of the snow blower to most ATVs or UTVs that have a rear ball-type hitch fitted. The coupling frame is attached to the rear towing hook and to the front

suspension arms via tension adjustable chains. The installation time, depending on vehicle and experience, could be as little as 5 minutes.

An ATV front winch (min 1500lbs) and towing hook are required for installation!

- Working width 1250mm / 1800mm
- Working height 500mm
- Ejection distance approx. 15 meters
- Electric motor adjustment for the ejection tube via onboard control panel
- Telescopic mounting frame adjustable to machine length
- Transport position and working position (adjustable with ATV winch)
- Safety bolts to prevent damages from obstructions
- Use oil Semi-Synthetic 10w-40

SNOW BLOWER 1250MM (ATV)

SNOW ROLLER / SKI TRACK GROOMER

Snow rollers help to prepare ski and hiking trails by compressing snow. Suitable to use with ATV/UTV (with snow tracks recommended), snowmobile, or a tractor.

Our product range includes snow rollers in two sizes.

Wider groomer / snow roller (2.7m working width) is ideal for making freestyle ski tracks. Up to 2

track setters can be mounted behind this to cut classic style ski tracks.

Narrower groomer / snow roller (1.45m working width) is excellent for tighter conditions, such as between trees. This roller can be fitted with 1 track setter to create classic style ski tracks. It is also useful for packing snow to make hiking/walking trails or fatbike trails.

Both types of ski track groomers can be equipped with an adjustable ice blade module to help maintain frozen ski tracks.

SNOW ROLLER

- Working width 2.7 meters (snow roller drum width 2.3 meters) or working width 1.45 meters (snow roller drum width 1.05m)
- Drum diameter 680 mm
- Adjustable drawbar height
- Adjustable between transport and working position
- The set includes a hitch coupler for a 50 mm hitch ball and a swivel eyelet for a pin-type connection

CLASSIC STYLE SKI TRACK SETTER MODULE

- Adjustable between transport and working position
- Track cutting width is adjustable: 190 mm / 270 mm / 290 mm
- Track cutting depth is adjustable: 30 mm / 40 mm / 50 mm

Product	Code

SKI TRACK MAKER

The ski track maker is suitable for preparing and maintaining ski tracks. It is suitable for coupling with an ATV, UTV (with snow tracks recommended), or a snowmobile. It is possible to prepare a 2.3-meter-wide freestyle track by compressing the snow with the ski track maker. A classic-style track can be made by fitting an additional classic track setter to the rear of the ski track maker unit.

- Working width: 2300mm
- Classic track width: 230mm
- 3 positions to fit the classic track setter (sides and center)
- Possible to add ballast weight (sandbags, etc.) on the classic track setter for more efficient compression of snow
- Easily adjustable ice blade for ski trail maintenance
- Support wheels for transport position – in transport position, the device is lifted 200mm above the ground

CARGO SLED

The cargo sled is a well-constructed sled with a large base bed area suitable for transporting large, bulky, and heavy loads. The sled is made of 8mm thick PE-HWU plastic, which is light, UV resistant, slippery, and durable even at temperatures as low as -50°C.

- Length: 2900mm
- Width: 1200mm
- Height: 200mm
- Eyelets for securing the load
- Anti-slip guides
- Set includes coupling for a 50mm ball hitch and towing eyelet for a pin-type hitch connection

Product	Code
Cargo sled	22.000

SKI SLED

A ski sled is designed for use with an ATV, UTV, snowmobile, or small tractor. It features a galvanized, powder-coated steel frame and a humidity-resistant plywood platform, ensuring durability even in damp winter conditions. The sled's high clearance, special wavy ski profile, plastic sliding surface, and spring suspension provide excellent stability and passability. It also includes removable spacers and platform guards for securing and transporting different goods.

- Platform dimensions: 800 x 2250mm
- Platform height: 300mm off the ground
- Ski dimensions: 180 x 1750mm (2 skis)
- Galvanized and powder-coated steel construction
- Waterproof plywood platform
- Spring shock absorbers on skis
- Plastic ski slides
- Removable struts
- Load restraint guards
- Set includes coupling for a 50mm ball hitch and towing eyelet for a pin-type hitch connection

TRAILER SKIS

Trailer skis make it easy to convert your trailer into a snow sled. Suitable for installation on trailers with a wheel width of 150 – 260 mm. Strong steel construction, plastic sliding surfaces, and easy installation with fastening straps.

- Length: 1450 / 2150 mm
- Width: 330 mm
- Height: 190 mm
- Plastic guides to prevent side sliding
- Fastening straps for fitting skis
- Suitable for road and off-road tires (wheel width 150 - 260 mm)

TRAILER IB-165 / IB-165 R1A

The IB-165 Offroad trailer is a platform trailer designed for use with small tractors and off-road vehicles. The trailer's wide, high-clearance off-road tires ensure excellent off-road capability.

The tiltable cargo box with completely removable sideboards allows the platform trailer to transport bulk spread, heating materials (e.g., firewood), pallets, and boxes. Additional accessories include gas spring, hydraulic, and electro-hydraulic tilting accessories, as well as cargo box board extenders and a PVC cover.

- Load capacity: 500kg
- Track width: 960mm
- Off-road tires: 22x11-8 "60F
- Manual tilting of the cargo box
- Removable front, rear, and side hatches
- Moisture-resistant plywood bottom platform

TRAILER OFFROAD 500/500 R1A

Offroad 500 is a solidly constructed trailer for household use. The tiltable cargo box allows for the transportation of leaves, soil, firewood, waste, etc. After removing the front and rear panels, logs up to 2.5 meters in length can also be successfully transported. Height extenders, PVC covers and various tilting solutions for the cargo box can be attached as accessories.

- Load capacity: 500 kg
- Off-road style street legal tires: 22x11-8"
- Tiltable cargo box
- Removable front and rear panels
- Removable cargo box height extenders (optional accessory)
- Cargo box dimensions: 1500 x 1100 x 550 mm

Offroad 500 R1A is EU type-approved street legal trailer for when you need to take your offroad trailer on the road. This trailer is certified for on-road use in the EU with R1a classification, and approved for road use up to 40 km/h. Comes with lights, VIN and CoC documents, with possibility to apply for number plates.

TRAILER OFFROAD PRO 1200 / 1200 R1A

Offroad PRO 1200 is a solidly constructed trailer for larger capacity household work. Its compact design, tandem axle, and wide terrain tires ensure good terrain passage and allow access to places typically inaccessible to larger equipment.

The 1,400 L capacity cargo box with removable height extenders can be used to transport loads up to 1,200 kg. After removing the front and rear panels, it is possible to transport logs up to 3 meters in length.

A tilting crane for the cargo box that can be operated with a manual or electrical winch is available as an accessory.

- Load capacity: 1,200kg
- Off-road style street legal tires: 22x11-8"
- 360° swivel hitch coupler
- Adjustable supporting wheel
- Tilttable cargo area
- Removable front and rear panels
- Removable cargo box height extenders (optional accessory)
- Cargo box dimensions: 2,000 x 1,100 x 520 mm (820mm with extenders)

FLATBED DUMP TRAILER

FD-1200 / FD-1200 R1A

Flatbed Dump Trailer FD-1200 is designed for use with small tractors and off-road vehicles (ATVs/UTVs). Its tandem axle construction, increased ground clearance, and wide all-terrain tires provide excellent off-road access.

The flatbed cargo box, which can be lifted using an optional crane with a winch, features completely removable sideboards, making it ideal for transporting bulk materials, firewood, pallets, and boxes. Additional accessories include side-board extensions and a water tank option.

- Load capacity: 1200kg
- Flatbed dimensions: 2080 x 1320 mm (82 x 52 in)
- Track width: 1030mm
- Tandem axle with four wheels
- Off-road style street legal tires 22x11-8"
- 360° swivel hitch coupler
- Adjustable support legs
- Tilttable cargo box
- Easily removable front, back, and side hatches
- Weatherproof plywood flatbed

FLAIL MOWER

A sturdy, towable flail mower designed for mowing large lawns, meadows, or roadsides. Different engine versions are available depending on the expected work conditions.

- 14hp versions: Best for mowing smaller areas and shorter grass on regularly maintained fields.
- 18hp V-Twin Vanguard versions: Recommended for larger areas, thicker and wilder grass, and uneven surfaces.

The mower is fitted with Y-blades for cutting thicker grass and hammer blades (optional) for regularly maintained lawns.

Use Semi-Synthetic oil 10W-40

ATV FRONT CUTTER

A powerful front-mounted cutter designed for demanding off-road vegetation management, the Iron Baltic Front Cutter is ideal for clearing brush, hay, bushes, and small trees with diameters up to 100 mm. Built for professional and utility use, this robust implement transforms your ATV into a fully capable land maintenance tool.

Equipped with a reliable 344 cm³ Briggs & Stratton petrol engine and a belt-driven transmission with a simple clutch lever, the unit delivers consistent performance in the toughest terrain. The cutter features six hardened steel blades and a 1.2 m cutting width for efficient clearing. A discharge chute and protective frame enhance safety and usability, while the adjustable cutting height and mounting frame angle allow for precise control.

The cutter can be quickly installed in the front center or left side of the ATV and is easily lifted to transport position using a standard ATV winch. Requires Iron Baltic's mid-mount model-specific or universal adapter for installation (sold separately).

Key features:

- Cuts brush, hay, bushes trees up to Ø100 mm
- 344 cm³ Briggs & Stratton petrol engine
- 1.2 m cutting width with 6 hardened steel blades
- Belt drive with clutch lever
- Quick front or side mounting, winch-liftable
- Adjustable height angle
- Protective frame and discharge chute for safety
- Adapter required for mounting (sold separately)
- Designed & manufactured by Iron Baltic, Estonia (EU)

BALE TRAILER

The compact design of the hay bale trailer and wide off-road tires ensure good passage and off-road capability for smaller jobs around the property. It allows for fast and easy transportation of hay bales from fields to storage, animal stables, barns, and feeding places. The trailer is maneuverable, causing no significant damage to the field terrain, and can easily pass between trees, over ditches, through narrow doorways, and into tight indoor spaces.

The trailer can be pulled by any vehicle fitted with a 50mm/2" hitch ball or a pin-type hitch connection (22.050S).

Features:

- Load capacity: 500 kg
- Maximum roll diameter: 1200 mm
- All-terrain tires: 22x11-8"

Product	Code
Bale trailer with manual winch	43.0000

Electric winch package	06.000
Towing eye 360-degree turning for pin-type hitch	22.050S

SILO & HAY BALE TRAILER

A heavy-duty trailer designed for transporting rolled silage and hay bales. It features a strong construction, tandem axle, and wide terrain tires, ensuring high load capacity and smooth terrain passage for quick transportation to barns, stables, or feeding areas.

The trailer comes with a lifting grip system for easy bale handling and an electric winch (2500 lbs) to simplify loading and unloading.

Key Features:

- Load capacity: 1000 kg
- Maximum bale diameter: 1500 mm (60 inches)
- Off-road tires: 22x11-8"
- 360° swivel hitch coupler
- Electric winch for loading/unloading bales (2500 lbs)
- Automatic locking system
- Strap to fasten bales

Product	Code
Silo & Hay Bale Trailer with electric winch	85.1000

SWEEPER COLLECTOR

Sweeper Collector is an easy to use paddock cleaner, the perfect tool to keep the paddocks free of horse droppings but also great to clean/collect the dead grass, leaves, woodchips or cut grass. Sweeper brushes/bristles have grooming effect on the grass surface, keeping the grass fresh and healthy looking.

The sweeper is powered by an efficient 6.5hp Vanguard engine, rotary broom is fitted with durable OMNILINE polypropylene brushes/bristles, designed to operate in all different kind of cleaning conditions. Large capacity roll-over hopper collects up to 0.75m³ of material (220kg max load) and is very easy to empty with the aid of the winch, after which the well-balanced hopper returns into a working position automatically itself. Adjustable height spring tines rake helps to pre-loosen and spread the hardened/dry droppings etc. before the collection by the brushes to ensure clean result after. Working height of the brushes is manually adjustable by default but the electric-hydraulic working height adjuster is also available

as an option, allowing comfortable adjustments when operating the tool without leaving the seat. Sweeper/collector tool is an ideal product for private horse owners and small animal farms and zoos, equestrian centers, horse riding schools as well as the public area (parks, city streets, etc.) maintenance and facility management companies.

Sweeper Collector is a tow behind tool that installs to an ATV, UTV or any other vehicle with 50mm (2") ball type hitch fitted, makes the cleaning of large areas like paddocks, parking lots or parks quick and easy.

RIDING ARENA LEVELER

The riding arena plow is intended for leveling and hoeing riding areas. The plow has spring spikes with an adjustable working height for surface hoeing. Adjusting the working angle of the side and rear plow blades allows for the surface at the edges of the riding arena to be shifted back to the middle. There are rubber edges and an adjustable perimeter wheel to protect the walls of a riding arena. The finishing roller compacts the soil, giving it a lovely, polished look.

The riding arena leveler can be towed by all vehicles equipped with a 50 mm / 2" ball hitch unit and with a towing eyelet (22.050S) installed as an optional accessory. The trailer can also be towed by hitching it to other vehicles equipped with a coupling device.

Setting the transportation position and operating depth is done with a manual lifting mechanism or a 12V electrohydraulic cylinder installed as an accessory.

RECEIVER MOUNT SYSTEM

The receiver mount system is a device mounted into a 2" receiver that different tools can be attached to for soil preparation, cleaning, or landscaping work. Setting the transportation position and work depth is done with a manual lifting mechanism or 12V electrohydraulic cylinder. The receiver mount system is suitable for use with UTVs or in ATV 2" (50mm) receiver couplings.

Support wheel (84.21000)

Support wheel to prevent the plow digging too deep (limiting the cutting depth of the plow).

Cultivator (84.4000)

Cultivator for weed removal or mixing soil prior to planting.

- Working width 1 450 mm

Drag harrow (84.7000)

Drag harrow for surface planning, soil tilling, smoothing and breaking up larger chunks of soil and readying the surface for seed sowing.

- Working width 1 500 mm
- Working depth 100 mm

Single bottom plow (84.22000)

A single bottom plow for plowing fields. By using this, soil is rotated to bring fresh nutrients to the surface while simultaneously burying weeds and previous crop residue in preparation for new sowing and planting.

DEMO VIDEO:

Two bottom plow (84.23000)

A two bottom plow or earthing plow for ridging and earthing work.

DEMO VIDEO:

Potato plow (84.24000)

A potato plow for digging up potatoes. The potato digging plow has metal rods that the soil passes through while the potatoes remain on the surface.

DEMO VIDEO:

ALL PLOWS ARE RECOMMENDED TO USE WITH SUPPORT WHEEL (84.21000).

Landscape rake (84.5000)

Landscape rake for soil preparation work, surface planing or field maintenance/cleaning.

- Working width 1450 mm
- Working height 350 mm

Rear plow (84.3000)

Rear plow for surface planing or cleaning waste, leaves, snow etc., from different areas.

- Working width 1450 mm
- Working height 300 mm
- Working angle adjustable from -16° to 16°

Push broom (84.12000)

Push broom to clean driveways, sidewalks, parking areas, squares, warehouses, barns etc., of waste, leaves, snow etc.

- Working width 1500 mm
- Working height 250 mm
- Working angle adjustable from -20° to 20°

Rake (84.18000)

The rake is an effective tool for clearing hay, leaves, branches and other debris.

- Working width 1500 mm

Tine Dethatcher (84.6000)

Tine Dethatcher is used to remove moss in lawn maintenance. Helps improve air circulation, promotes grass growth and gives the lawn a more aesthetic look.

- Working width 1500 mm

Plug aerator (84.19000)

Plug aerator is a tool that creates holes in the surface of the soil, allowing air, water and fertilizers to reach the roots better, helping the lawn to grow.

- Working width 1250 mm

Reel holder (84.16000)

The reel holder is a tool for carrying rolls of wire or twine when building fences. Suitable for up to 4 rolls (maximum diameter 300 mm / width 270 mm).

Land roller (84.15000)

Land roller for landscaping and agricultural work.

- Diameter 310 mm
- Working width 1350 mm

Disc harrow (84.2000)

Disc harrow to break up hard soil, dry grass and turf, chop weeds or other soil preparation work.

- Working width 1 400 mm (adjustable)
- Spherical discs Ø 365 mm
- Adjustable disc operating angle from -30° to 30°

Log support (84.14000)

Log support is a tool for holding logs for cutting or hauling wood out of the forest. We recommend using a suspension lock (14.11600) or a shock absorber lock (14.12200) when using this product.

Equipment box (84.13000)

Equipment box with a capacity of 70L (1430 x 400 x 170 mm)

Can be used with a chainsaw holder (14.7200).

DRAG HARROW

A harrow for breaking up soil or planning the surface. It is suitable to use with ATV and UTV off-road vehicles, small tractors or lawn tractors. Cutting or smoothing work position according to which side down the harrow is pulled.

- Working width 1200mm
- Working depth 100mm
- Wire diameter 12mm
- Cutting or smoothing working position

Product	Code
Drag harrow	591000

LEVELER

A leveller is a simple steel net piece of equipment for levelling and planning large areas. It is suitable to use with ATV and UTV off-road vehicles, small tractors or lawn tractors. The leveller is suitable for preparing fields, lawns and prior- or post-processing the soil when seed planting. It is also suited for levelling light gravel and sand beds.

- Working width 1500mm
- Frame for mounting extra weight

Product	Code
Leveler	59.2000

FLIP OVER DISC

A disc harrow with a simple and strong construction for breaking up turf and weeds, as well as other soil-improving works. The transportation and working position are switched in between by turning the disc cultivator around. It is possible to add extra weight for ballast (sandbags etc.) to improve work effectiveness / cutting depth of the discs. The disc harrow is suitable to use with ATV and UTV off-road vehicles, small tractors or other vehicles fitted with a 50mm / 2" hitch ball.

- Working width 1500mm
- Working angle of 20 degrees
- Cutting depth 150-180mm
- Adjustable drawbar height (3 positions)
- Spherical discs 460mm in diameter (8 discs)

Product	Code
Flip over disc	51.1000
Accessories	Code
Towbar height adjuster	14.11800

LAND ROLLER

Field or land roller to roll fields after plowing as well as compact after sowing or leveling work. The field roller mounted on an ATV coupling is an easy to maneuver and sufficiently light tool ideally suited for leveling small and medium-sized fields after plowing without the vehicle sinking into the ground and creating tracks. The roller can be filled with water to add weight to further compact and create a smooth and even surface.

- Working width 1 500 mm
- Roll diameter 475 mm
- Off-road tires 22x11-8"
- 360° swivel hitch coupler
- Weight 120 kg / 380 kg (when filled with water)

Product	Code
Land roller	57.2000

GRADER / ROAD SCRAPER

A towable road scraper for gravel road levelling and surface planning. Road scraper is equipped with a frame for a 600x800mm pallet on to which a ballast weight can be placed - stones, sandbags etc. The transportation and working height positions are easily adjustable using support wheels. Electric or hydraulic control sets are available as accessories, these allow for the road scraper to be set into the transportation position without leaving the driver's seat.

- Working width 1800mm
- Double-sided toothed blade
- Frame for mounting ballast weight
- Adjusting in between transport and working position via support wheels
- Optional 12V DC electric or hydraulic height adjustment from driver's seat

TIMBER TRAILER

IB 1200 / 1200 R1A

Timber Trailer IB 1200 is a solidly constructed timber trailer for use with small tractors or off-road vehicles. A compact solution, tandem axle and wide terrain tires ensure good terrain passage, allowing access to places that are typically inaccessible with larger gauge equipment. The adjustable length of the trailer allows logs up to 3 meters long to be transported. The timber trailer has rotatable and easily removable load posts that significantly simplify loading and unloading.

A crane with telescope construction support feet that hold the trailer firmly on the ground can be installed when loading and unloading a larger log to simplify the process. The length and height of the crane boom can be adjusted as required. The IB 1200 uses an electric winch powered by the battery of the vehicle towing it to drag and raise logs.

1400 L cargo box with removable extensions available as an option for the timber trailer. Crane with electric winch for tilting the cargo box.

- Load capacity 1 200 kg
- Crane lifting capacity 300 kg
- Tandem axle with four wheels
- Off-road style street legal tires 22x11-8"
- 360° swivel hitch coupler
- Adjustable supporting wheel
- Adjustable trailer length

LOG HAULER

The log hauler hitched to an ATV, UTV or any other kind of off-road vehicle forms a light and compact, easy-to-use transportation solution which can be used for hauling long logs out of the woods. It is easy to manoeuvre between trees and pass through wet areas and ditches with it towed behind the off-road vehicle and haul the logs out from areas where access with larger and heavier vehicles is restricted or would be more difficult.

A wheeled rear support allows to lift the rear end of the log so that it can be transported cleanly, without damaging the forest ground with the dragging log and without further damages to the log itself. The logs can be pulled and lifted clean into the hanging position with the choice of either a manual or electrical winch set.

The log hauler set includes a hanging system for transporting logs with a larger diameter. A rotating carrier frame for smaller logs is available as an additional accessory. The carrier frame is for loading the smaller logs, branches, brush etc.

- Load capacity 500kg (1000kg combined capacity with the rear support used)
- Strong, rigid steel square tube frame 50 x 50 x 3 mm construction
- Maximum log diameter 50 cm / 20"
- Off-road tires 22x11-8"
- 360° swivel hitch
- Hand winch or electric winch option to pull logs out of the forest
- Chains for hanging logs and carabiners for fastening
- Optional rotating carrier frame for transporting smaller logs
- Optional rear support

WOOD CHIPPER G3

A wood chipper with a drum cutting method to produce wood chips from branches or smaller diameter trees. This can be used to cover sidewalks as mulch, for heating, etc. The compact size of the chipper ensures that it is easy to maneuver when mounted on an off-road vehicle. It can thus be used in dense or other hard to reach areas without damage to the surface. It is suitable for small-scale forestry work as well as park and real estate maintenance.

Optional battery (not included, connecting wiring included) 183x78x170mm Type: 6-DZM-20

- Cutting method – drum
- Productivity 6–10 cbm/h
- Wood diameter max 150 mm
- Engine 14hp (B&S 2100 XR Series) with electric starter
- 360° rotating ejection tube
- Semi-Synthetic oil 10W-40

STUMP GRINDER SG-8

The Stump Grinder SG-8 is specifically designed for the efficient and quick removal of tree stumps. Powered by a 14hp Briggs & Stratton engine and equipped with eight carbide-tipped teeth, it ensures excellent cutting performance, making it easy to grind stumps up to 300mm above ground level and down to 230mm below ground. This makes it suitable for removing stumps of any diameter. The multi-position handle simplifies maneuvering and allows grinding from various angles.

Compact and light enough to be towed by an ATV or a small tractor, it's easy to transport and maneuver in tight spaces, such as forests or gardens. The tow-behind stump grinder is an effective and convenient solution for those needing to remove stumps in challenging terrains or areas inaccessible to larger machines.

Key features:

- Strong steel structure with a powder-coated finish
- Towbar with a 50mm / 2" coupler and trolley wheel
- Multi-position adjustable handle
- Powered by a 14HP Briggs & Stratton gasoline engine
- Adjustable rotation handle
- Tire fixation with brake lever
- 8 replaceable carbide teeth
- Emergency stop bar

LEAF VACUUM

The leaf vacuum is equipped with a reliable 6hp Briggs & Stratton engine that is used to run a durable turbine 4 blade impeller made from Hardox 400 steel, with a productivity of 70m³/h. The product is equipped with a suction tube with a diameter of 180mm and a length of 3.5m, with a light and convenient wheeled nozzle.

The product set consists of the BASIC 500 (61.1000) modified trailer and the leaf vacuum module (81.2500) attached to it. The leaf vacuum module (vacuum, load surface grille, PVC cover) is easy to install onto the trailer and can easily be removed for the off-season period so that the trailer may be used for other purposes as well if desired.

- Cargo box capacity 1.2m³
- Vacuum productivity 70m³/min
- Load capacity 500kg
- Engine 6hp Briggs & Stratton
- Off-road tires 22x11-8"
- Flexible suction tube diameter 180mm / length 3.5m
- Oils and biological acids resistant suction tube materials
- Tilttable cargo box
- Removable PVC cover and hatches
- Adjustable support leg
- Use Semi-Synthetic oil 10W-40

HYDRAULIC POWER UNIT

The compact, electric motor-powered hydraulic unit is for ATV / UTV coupling devices. The hydraulic station has two ¼" quick release hydraulic couplers, to which it is possible to attach cylinders for turning and lifting the snow plow, controlling the bucket or setting the working positions of other coupled equipment. Allows to use the "free floating" option on one cylinder – good to use on a plow up-down movement cylinder. The unit is controlled via a wired remote control which can be mounted to the vehicle's control panel or any other convenient location using the supplied mounting bracket. The electrical power for the equipment to be taken from the electrical system of the vehicle.

- Productivity 2.5l / min (0.45cm³ / rev)
- Operating pressure 180 bar
- Motor 800W / 12V DC
- Oil tank 1 liter
- Hydro output 2 x ¼"
- Floating and fixed position adjustable from the remote control

ELECTRO-HYDRAULIC CYLINDER

Compact electro-hydraulic cylinders are intended for exterior use, for setting the work and transport positions of different products. The product can easily be transferred from one piece of equipment to the other. The 12V DC power it requires to operate, taken from the electrical system of the vehicle. The selection includes MAP (Korea) and KYB (Japan) cylinders as well as different sets of control panels with power cables.

- Pull force 1800lbs (816kg)
- Cylinder rod diameter 20mm
- Mounting eye diameter 16mm
- Mounting gap min 380mm
- Stroke 250mm
- Power supply 12V DC

Product	Code
Electro-hydraulic cylinder MAP	70.700
Electro-hydraulic cylinder KYB	70.1000

Accessories	Code
One cylinder control kit	70.2500
Two cylinder control kit	70.2600
Power extension cable 3m	70.2700
Cylinder extension cable 1.2m	70.2750

To use with:	
Standard plow turning and lifting	Page 18
Adjusting the working position of the grader	Page 80
Trailer IB-165 cargo box tilting	Page 48
Trailer Offroad 500 cargo box tilting	Page 50
Receiver mount system motion	Page 69

SUSPENSION LOCK

Suspension lock to lock the vehicle's suspension. The lock with its universal design attaches to the vehicle's front or rear a-arms, and a connecting rod with a pin connection fixes and locks the suspension travel. Installation is quick and easy, fitting most ATV models with „A“-style arms. Recommended for use when working with heavier receiver mount implements or front mounted plows/buckets.

MULTI-MOUNT WINCH

Multi-mount winch is a compact universal electric kit which allows mounting and transferring a winch between different vehicles equipped with a 50mm ball hitch. The winch plate is installed onto the rear 50mm hitch of the vehicle. The kit includes wiring and power socket for quick detachment and reinstallation. Suitable for all winches up to 4000 lbs.

- Pulling force 1134 kg (2500 lbs)
- Motor 1kw, 12V DC
- Transmission 138:1
- Pulling speed 2.1 – 7.5 m/min
- Strong nylon cord 6.3mm x 12m (0.24 in x 39 ft)
- Wireless remote control and wired standby switch
- Line guide with large base roller

Product	Code
Multi-mount winch	14.11500

EQUIPMENT BOXES

The steel made equipment box with a universal design solution is for installation on POLARIS SPORTSMAN models but is suitable for attaching to front and rear racks of other ATV models as well. The product's separating inner walls have adjustable locations and the bottom is covered with a rubber that prevents slipping. The box is attached to the rack using U-clamps that come with the set or with eccentric clamps that can be ordered as an additional accessory.

The equipment box can be ordered, if desired, together with the universal chainsaw holder. The holder, made from durable plastic, has a socket that fits all sizes of saw chain guide plates.

A PVC cover for the equipment box, which protects the box contents from rain, snow or dirt, is available as an optional accessory.

CLUTCH KITS

ATV and UTV performance depends heavily on the clutch system setup. Stock clutches are designed for standard tires and general use, but when you start towing heavy loads, navigating technical terrain, or upgrading to oversized wheels, the original setup no longer performs at its best.

Our Stage 3 clutch kits are designed to optimize power delivery, improve throttle response, and protect your drivetrain under demanding conditions. These kits are not one-size-fits-all - they're tailored for specific terrain types to ensure your machine performs exactly how you need it to.

TRAIL

Our best all-around use kit helps to transfer the engine power better to the wheels. Better acceleration and an overall improved riding experience. Quicker backshift which results in crisp throttle response. Reduces belt slip and minimizes heat generation. Suitable for vehicles with tyres sized between 25" - 29".

MUD

Mud kit is for riding in thick mud or have big tyres. Helps to transfer the engine power better to the wheels. Quicker backshift which results in crisp throttle response. Reduces belt slip and minimizes heat generation. Suitable for vehicles with tires sized between 29"-34".

Our model-specific clutch kits include a detailed installation and set-up manual. Installation is not complicated but may require special tools and some technical knowledge, therefore professional installation and set-up is recommended.

Our clutch kits are developed in cooperation with Vauhti Varikko.

SKEG MÖNSTER

Skeg Mönster kit is best for Mud/Skeg riding with oversized tyres. Helps to transfer the engine power the best to the wheels. Quicker backshift which results in crisp throttle response.

Reduces belt slip and minimizes heat generation. Suitable for vehicles with tyres sized between 30"-34".

Segway Snarler AT6	38°-48°	80.1180

HELIX versions depending on the machine configuration for optimal power transmission.

Straight, fixed angle Helixes for getting linear upshifting behavior;

- 35° for mud use (for all engines)
- 40° for mud use (for all engines)
- 50° for small tyres and fast acceleration (recommended for upgraded two-cylinder engines)

Multi-angle/progressive Helix to get the best of both worlds;

- 40°-48° for all single cylinder, all-around use
- 38°-52° for all two cylinders, all-around use
- 32°-42° for SKEG MÖNSTERs
- 43°-56° for On-Road use

- More power — over +10 hp to the wheels (depending on model)
- Increased torque throughout the rev range for stronger acceleration and better pulling power
- Optimized air-fuel ratio (AFR) to balance power output and efficiency
- Completely reworked ignition timing maps to safely extract maximum performance
- Refined and smoother throttle response through newly calibrated throttle maps
- Drive modes individually tuned for improved usability in various conditions
- Torque limiters adjusted to let the engine deliver its full potential
- Downhill assistant function retuned for softer operation - eliminates throttle sticking or jerky feel when descending
- Higher speeds and more torque available in both Low (L) gear and Reverse (R) gear
- Maximized top speed capability without factory speed restrictions
- Full plug-and-play installation - no permanent changes to your ATV required

The Power ECU is a full replacement for your ATV's original ECU, designed to take engine performance and drivability to a completely new level. Developed through extensive real-world testing and fine-tuning, this ECU is engineered for riders who want maximum power, improved control, and enhanced rideability — whether for off-road adventure or competitive racing.

By optimizing all key engine management parameters and eliminating factory limitations, the Power ECU unlocks performance gains that are simply not possible with the stock unit. Installation is easy, a true plug-and-play solution with no additional modifications required.

FOR OFF-ROAD/RACING USE ONLY!

The Iron Baltic Speed Limiter Removed ECU is a plug-and-play replacement for the factory ECU, developed for riders who want to remove the built-in speed restrictions imposed by the manufacturer. Whether you're riding on open trails, private roads, or racing off-road, this ECU allows your ATV or UTV to reach its true top speed without electronic limitations.

Unlike full performance ECUs, this unit focuses specifically on removing speed caps while maintaining stock drive modes and fuel maps, making it ideal for users who don't need full retuning but want more freedom from factory restrictions.

Key benefits:

- Removes OEM speed limiter restrictions
- Increases top speed in both High and Low gears
- Plug-and-play installation — no additional tuning required
- Retains factory drive modes and engine behavior
- Ideal for utility, recreational, or sport use where unrestricted speed is desired

Note: For off-road or closed-course use only. Not intended for public road use.

FOR OFF-ROAD/RACING USE ONLY!

MODEL SPECIFIC MOUNTING KITS

FRONT-MOUNT ADAPTERS

Model specific adapters for mounting frontmount system.

MID-MOUNT ADAPTERS

Model specific adapters for mounting midmount system.

FRONT WINCH MOUNTING KITS

Model specific adapters for „WARN “ or „Bronco“ type of ATV winches with mounting pattern of 76x124mm

REAR WINCH MOUNTING KITS

Model specific adapters for „WARN “ or „Bronco“ type of ATV winches with mounting pattern of 76x124mm

HITCH BALL MOUNTING KITS

Model specific reinforced design rear hook adapters. Most kits include a 50 mm hitch ball and a 16mm pin connection.

LIFT CYLINDER ADAPTERS

Model specific adapters for installing hydraulic and electro-hydraulic cylinders for up-down movement of plows, push brooms and buckets.

NOTES

This image shows a full page of a worksheet designed for handwriting practice. It features approximately 20 horizontal dashed lines spaced evenly across the page, providing a guide for letter height and placement. The background is plain white, and there are no other markings or text present.
